

## PRESS RELEASE

# WorldCast unveils the ECRESO Switch Controller for RF sites

Miami, Florida, March 2020 (for immediate release) - WorldCast Systems, a leading supplier of advanced broadcast solutions for customers across the globe, announces a new product to its ECRESO range, the Egreso Switch Controller.

When designating the management of an antenna system to a dedicated switch controller, network operators are looking for a reliable, secure, cost-effective, and simple-to-use solution. This is where the new Egreso Switch Controller comes in. The Egreso Switch Controller (ESC) is a single, centralized unit which automatically moves RF switches at transmitter sites for analogue or digital Radio or TV.

Reliable, robust, and easy-to-use, it facilitates and secures maintenance and antenna switching operations while maintaining high uptime and staff safety. Highly configurable depending on the number of transmitters, antennas, patches or switches installed on-site, it also provides constant system control and monitoring, locally and remotely, of up to 5 antenna switches.

Other functions include status verification via dynamic synoptics and front-panel, important number of GPIOs allowing to integrate field parameters in the operation chain, Highly reliable FPGA logic for switch changes, and more.

For a demo of this new, advanced solution for antenna switches at RF transmitter sites, visit booth N5206.

**About WorldCast Systems**

WorldCast Systems engineers high-performing, reliable and innovative broadcast solutions to the Radio & TV industry worldwide, meeting the needs of both international broadcast networks and small private stations. Its industry leading brands include APT, Eceso, and Audemat, with an extensive offer including audio codecs and mobile network access for remotes and OBs, FM transmitters, RDS encoding and sound processing, and RF signal monitoring, test and measurement. Headquartered in Bordeaux, France, WorldCast Systems employs around 100 people worldwide, with an R&D center in Northern Ireland and offices in the UK, the US, and Malaysia.
