

VIRTUAL SCRIPT EASY

Advanced Facility Control and Automation

ScriptEasy is the revolutionary facility control software developed by WorldCast Systems to create “Smart” sites and automatically correct any critical errors that affect operations.

Featuring an intuitive Graphic Scripting Interface (logic operators, live user actions, timers, complex alarms, ...), Virtual ScriptEasy allows to create your own autonomous sites and to bring intelligent monitoring and control at network scale. With Masterview, build customized dashboards with your alarms, readings and actions.

Now available as a software, Virtual ScriptEasy can be deployed as a service (SaaS), on your servers or any compact devices (On-Premise).

Virtual ScriptEasy also complete your Virtual APT solutions and benefits from full integration into Kybio Media.

ScriptEasy technology is also available on Audemat and APT hardware equipment.

Benefits

What our customer are saying:

«As a “smart” approach to facility management, ScriptEasy does not just process contact closures. It performs processes; and you can program it to think just like an engineer.»

Jeff Rosenberg, President & Chief Engineer
Modulation Magic, USA

Protects your investment

On-air availability rate has a direct impact on a station's financial health. ScriptEasy technology allows you to avoid off-air time using intelligent scripts and automation. Your facility becomes autonomous and can apply automatic actions for an instant service restoration. In case of impossibility to restore the broadcast, ScriptEasy notifies you by email or by SNMP Trap so you can take immediate action

Reduces your costs

Scripts drastically reduce your maintenance costs by reducing human intervention and restoring your broadcast as needed. When an intervention is necessary, Virtual ScriptEasy displays all the information needed to identify and correct equipment failure. With preventive alarm settings, you can proactively perform equipment maintenance before it fails.

Brings flexibility and scalability

Virtual ScriptEasy is a scalable and customizable solution. Make your monitoring and control installations evolve as needed by easily adding or removing devices and services. Complete the monitoring of your installations with Kybio, the NMS that enables centralized supervision, customized alarms and dashboards.

Virtual ScriptEasy | Multiple Views. Powerful Insights.

ScriptEasy script creation with drag and drop method

- Combine logic doors, mathematical functions, timers, schedulers, pulses, counters, cycles, ping, push and press buttons and more
- Drawing tools and comments to help organize the script
- Remote control or automatic actions triggered by relevant information such as events or a combination of statuses
- Advanced functions: Ping, SNMP commands (SET, GET, GETBULK), SNMP trap reception
- Script operations can be simulated locally, modified, saved and restored or copied from one unit to another.

ScriptEasy Masterview

- View creation and customization using a standard web browser
- Provides remote monitoring and control from anywhere
- Each view can contain as much information as desired
- Pictures, text and other graphics can be added to the views
- Drawing tools to help create friendly, customized view(s)
- Different views possible to group information or to provide a specific status

On-Premise Annual Licence

- Communication with 10, 25 or 50 SNMP devices
- ScriptEasy software for script/graphical configuration, schedules, automation, alarms...
- MasterView to create customized views
- TCP/IP communication compatible with any SNMP manager (direct compatibility with Kybio)
- Standard Support

*Hosting or hardware to run Virtual ScriptEasy is not included.
Requires a Linux System to run.*

SaaS Monthly Licence

- Cloud hosting
- Communication with 10, 50 or 100 SNMP devices
- ScriptEasy software for script/graphical configuration, schedulers, automation, alarms...
- MasterView to create customized views
- TCP/IP communication compatible with any SNMP manager (direct compatibility with Kybio)
- Standard Support

ScriptEasy technology is also available on WorldCast Systems products.

- AUDEMAT CONTROL SILVER
- AUDEMAT FM/DAB PROBE
- AUDEMAT RDS ENCODER
- APT IP CODEC
- APT AoIP MODULE
- APT IP SILVER

In addition to SNMP, most of WorldCast Systems products include I/Os (relays, digital inputs and metering inputs) managed by Scripteasy for maximum connectivity.*
